

Sofa armrest with ratchet positions

This armrest fitting was designed for use in connection with lifting points. With the height adjustment and a comfort swivel function of the upper armrest segment, the fitting allows a particularly good adaptation to the desired sitting and relaxing position. By setting up the armrest, it can also be used as a headrest and thus the sofa as a 'cross-sleeper'.

Sofa armrest

Armrest adjustment 10 locking positions

Art-No. AL 10-000051

Functions

- Can be set up vertically
- 10 locking positions + reset area
- Height adjustment approx. 140 mm
- Rotating function of the armrest connection

Advantages

- Stable, relatively high load capacity at least 30 kg
- Low noise and maintenance free

Technical features

- Galvanized and / or powder coated
- Visible parts ground stainless steel
- Center distance 250 mm

Application and concept requirements

- Also suitable for slim armrests
- Armrest thickness from 80 mm
