

Ratchet Gear GL 10 with return spring

The joints supplied by confer originate from the collaboration with the company KOYO, the leading Japanese joint manufacturer. Only joints are used that meet confer's high demands regarding resilience and high-tech functions. The fine rasterization of the adjustment steps particularly meets the requirements for convenience.

Technology

- Encapsulated snap-in housing
- 90° adjustment in 2° steps
- Reset 18° via return spring
- Raster noise very quiet
- Galvanized surface
